

QUICKLY POWERS HART DEVICES

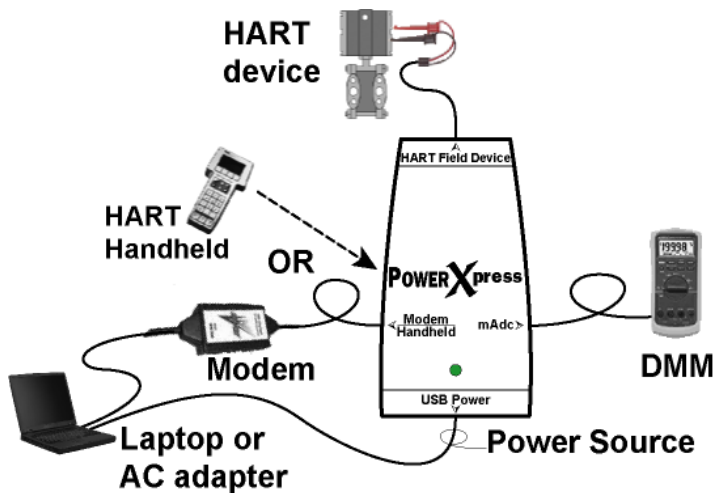

The PowerXpress is a complete and flexible power solution kit, that quickly delivers the required power to smart devices and provides the required HART network load needed for device configuration and commissioning.

PowerXpress reduces multiple device connections and simplifies the process for quick, easy, safe and reliable device communication.

Works with your existing handheld or PC-based configuration software applications.

Easy connection to your:

- √ HART-enabled Device
- √ Handheld Configurator
- √ mA meter / DMM
- √ HART Modem
- √ Power Source - PC USB or 110/220VAC (AC adapter included)

WORK SMARTER ~ POWERXPRESS

- Powers devices using your laptop USB connection or a 110/220 VAC power adapter (included)
- Simplifies modem, handheld and digital multimeter connections
- Reduces device configuration and commissioning time
- Powers all 4-20mA, 2-wire HART devices
- Includes:
 - √ Internal load resistor
 - √ Milliamp tap
 - √ Over current protection
 - √ Mini-grabbers
 - √ Adapter kit for modem and handheld
 - √ AC power adapter
 - √ Power indicator LED
 - √ Easy carry storage case

HART is a Registered Trademark of the HART Communication Foundation

POWERXpress™

Power Solution for HART® Devices

BENEFITS

- Quickly supplies 24VDC to 2-wire devices
- FAST connection kit includes everything you need for reliable communication
- Battery powered from your PC or 110 /220VAC power adapter (included)
- Reduces smart device configuration time
- Standardizes work processes

FEATURES

- Completely portable when configuring devices with your laptop PC & configuration software
- Provides power supply and interface connections for 2-wire HART enabled device communication supply options
- Universal design works on all 2-wire devices
